The improved motion capture technology is more precise than ever, allowing players to better control their every movement. You'll be more reactive and will be able to better predict players' behaviours, dodging tackles with fine-tuned intelligence. The net result is a fluid and superior gameplay experience. The "Intelligent Player Trajectory" system uses the improved motion capture technology to more

intelligently predict players' movements and react quicker, with all actions in the direction of the next move more quickly executed. You'll be able to deliver a controlled, more agile and powerful style of play.

Keepers The new match engine has been refined, with new and improved goalkeepers and many new goalkeeper-specific elements. The new goalkeepers will always have a full three-dimensional view of the goal, giving you superior situational awareness when saving shots on goal. You'll also gain more control over the ball. As the ball comes into play, you'll be able to position the goalkeeper to influence the trajectory and direction of the ball. The new goalkeeper movement in the A.I. system will also make interceptions more plausible.

Defensive Midfielders **Attackers** New tactical options Five new tactics **Ninja Defend** **Goalkeeper**

Goalkeeper AI has been improved, and goalkeeper animation and interaction between them and the rest of the team has been improved. This includes goalkeeper individual behaviours such as training and recovery, participation in the build-up of attacking plays, positioning and communication. **Situational Awareness** Situational awareness has been improved. The goalkeepers will better anticipate the next move of the ball, while players will always prioritise the move of the goalkeeper over any other player. **Referees** A new

refereeing system has been introduced. It improves the characteristics and communication of referees and refs, and also makes the offside and off-the-ball decisions more natural. New Technical Skills The new motion capture technology allows us to introduce three new technical skills. Agility Agility has been improved and quicker offensive runs and sprints have been added. Agility is now a key element of your play style. You'll be able to fight off challenges and outsmart your opponents, leading to quicker, more efficient and safer passes.

Everyone knows the name, but what does FIFA mean? Is it a player? A team? A series? Or, is it what we do for fun? Get to the answer below! Why create FIFA? We created FIFA for our fans. To create the ultimate footballing experience, we needed to be fans ourselves. We wanted to live, breathe and play football. We spend hours planning, researching and creating every aspect of FIFA. But the passion of a fan is what drives us. It's what keeps us coming back to the game. Our fans are the greatest inspiration. Football can be a violent sport, but the FIFA community stays away from that side of it. We want people to have fun with our game, to enjoy the moments of being a

football fan. How does the power of FIFA benefit every player? Our goals include immersing you in the moment, and that's what power brings. Our platform is built to allow players to truly experience that aspect of football. Your team and your player will perform at peak levels. The game's engine and graphics technology is built from the ground up to make you feel and play like a real football superstar. This helps to create real emotion, real reactions and real power. Every single decision we make, every option we make, is meant to help you perform at the highest levels. But it doesn't stop there. Understanding what your fans want, how they play and what their expectations of you are will make you the very best player on the pitch. Creating a more personal experience Making you feel and play like a real football star is just the start. We are always striving to create a more personal experience with each player. For example, you can set your own kit. You can give your player their own unique look. You can watch your dynamic player's personality change based on the activity mode you choose. We even go as far as to allow you to design your own iconic kits - and you can even wear these kits in-game. Power of FIFA benefits the community

Our game is the most popular football video game in the world. Not just in the UK. Not just in Europe. Not just in North America. Not just in Africa. You name it - we're the best. And our players know what it takes to be the best. We want to give them the best bc9d6d6daa
