I'm a one man band that plays the game while doing some other stuff at the same time. Its a one man band because I have a normal job and I can't spare the time to learn how to make games while I work a 9-5 job everyday. Please help I cant fix the game. Every time I play it, at the end, the game says "done, but it didnt run". If I download the.RUN it tells me the file was not found.I've been googling it for a while and nothing has helped.It may be of this game: I am trying to play this game in the most recent.RUN but it is not working. I get the error:Game not found.Here is a screen capture of the error:The game starts when you enter the (ext) map, play, then the server starts. Why doesn't the server start? I have been looking all over for an answer to this and nobody seems to be able to help me out. I just started playing here and at first it was great, what they did for the zombie mode I think was awesome. I was having so much fun playing with people from all over the world on my gun games and then it wasn't! I know that's probably too negative but whenever I play a game, I have high hopes. As soon as I started the campaign it was such a letdown, the way the zombies were to me was the best to date, especially now that they're game breaking but then again I liked the game overall. And the guns don't seem to be that good, if you ask me I thought the pistol was good enough that I'd use it for the whole game, no..it's nothing, the only good thing was the explosion of the grenades. Otherwise, the only decent gun was the minigun and if you don't want it, it's like another two bucks. Anyone else have any experience with this game? Any good or bad experiences? Is the server down or what could be the issue? I am playing this game since yesterday night. It's okay. I would like to add a couple of things I dislike about the game. - First of all, the weapon choices, as other people have said already, are VERY limited. If you want a more realistic looking gun, you can only get that in zombie mode, if

Army General

The original AI War was a light wargame that pitted humans against AI machines. Most of the AI was rule-based, which meant certain "types" of unit would attack in a certain way, in a certain terrain, with a certain strategy. Army General is the next step in the series, bringing a lot of new units that weren't possible in AI War 2, and taking a lot of mechanics that were fun to add in the original into a new complex and combat-tested set of rules.

Some examples of what you can expect in Army General

- Many, many new infantry, artillery, and unit class abilities
- Attack move abilities
- Higher unit "area of effect" attacks

-
- Lots of new unit variants, new upgrade trees, and new special abilities
 - Numerous variations on how to play the game
 - 10 great mission based scenarios, plus optional missions for more terrain and unit types
 - ACS characters to help turn up the AI difficulty
 - Two new game modes: "Target Scenario" for holding a line, and "10 Missions" for squad based or horde (or crossbow) warfare
 - Ambush mode added
 - Two other new ways to earn victory points besides dying or winning
 - Plus the "Artificial Humans" mode, which brings chaos without autobalance or AI codes

What's new:

man (soundtrack) Birdman is the original soundtrack of the Spanish-Mexican motion picture Birdman, directed and written by Alejandro González Iñárritu, produced by The Weinstein Company and distributed by Warner Bros. through Pantelion Films. The film released in Mexico on September 18, 2014, in the United States on October 22, 2014, and on November 12, 2014 in most of the rest of the world as part of The Weinstein Company's Day-and-date promotion. The film's score was composed by Alessandro Cicognini. The scoring process lasted three years (2011 to 2014), with Cicognini composing the score from 2011 to 2012, Tame Impala's Kevin Parker participating in a one-month "scenario design" session, and Inárritu and Cicognini revisiting Cicognini's work when Parker was unavailable, for an additional development session at the end of 2012. The main theme is a minor key chord progression; Cicognini used guitar percussions and Daniel Huguet's electronic wizardry to reinterpret the tonal palette. The soundtrack was inspired by the 1960s French-Moroccan soul genre in a way similar to The Umbrellas of Cherbourg, Vol. 3. It features psychedelic guitar and harpsichord arrangements, supported by small percussion. The album received acclaim as one of the most eclectic of 2014. It was nominated for the D.i.C.E. Music Award for Best Soundtrack, but was eliminated in round 1. Background Alejandro González Iñárritu began developing the script for Birdman in 2011. After finding a character that was unsuitable for Nicolas Cage, Iñárritu collaborated with composer Alessandro Cicognini (a Boxer/Oscar de la Renta/Jason Wu creative director in New York) for three years on the score. Cicognini's wife moved to New York City in order to assist as a script supervisor during pre-production. Eventually, she met the film's producer, Harvey Weinstein, who suggested the band Tame Impala as an alternative for a voice that matched the film's aesthetic. Cicognini's wife mentioned that she had met the band before when they performed at the Mirage Hotel. She then suggested the band as a possible alternative, to which Cicognini agreed. At this point, Cicognini started to receive more inspiration from the 1960s French-Mor
