Tv Boxes run linux or OSX (mac) or ubuntu... this box is running windows like it is 1999. I decided to check in the wiki for the big brother, the CM ND25, to see if it had the same problem. <https://wiki.linuxfoundation.org/usb/dvb-v4l2>. UPDATE: On further investigation, I found out that the DVBViewer displays the error in the log file instead of the main window and the DVBViewer isn't closing correctly. After closing the DVBViewer and reopening the program, the error no longer appears and the TV-programs can be viewed. So as you can see it's really easy to write drivers for the mygica chips. Next step is to see if they work on modern Linux systems. So stay tuned to see if they work on your Linux system. I will report soon. My tv-viewer app shows all the 13 channels with no problem at all. I installed the app called TVI-DVB52 or TVI-DVB52 in the Play Store. It is a TVI DVB-52 decoder. It also works on any Android device. When I attempt to scan for a channel on my computer, I get this message: "This channel is not supported at the moment." I put my Android phone near my computer and selected the same channel on my Android phone, which also says "This channel is not supported at the moment." I installed the update and used as mentioned above to open DVBViewer 12.7 for Windows. It has a new Source Filter class that works with the YoTV DST-CD330C. With this version, I was able to watch TV channels, but could only do so by pressing the menu button on the remote control. I was able to view some channels such as MTV, Cartoon Network, Fox News, and several other channels, but others such as BBC, National Geographic Channel, "ABC", "NBC", PBS, and other similar channels were not able to be viewed in DVBViewer 12.7. This was not a problem with DVBViewer, as I had the same problem with DVBViewer 7.0 on Windows 10.

User Experience: I'm having a terrible time trying to use this stick. With all it's goodness comes a few issues. I don't believe in things to start with. This stick requires a micro SD card. I've tried using a small SD card and it took 3 tries before I got the stick to recognize and use the card. Now I have 3 cards, two smaller SD cards and one larger one, none of which it recognizes and uses. I can get the USB part to recognize the card, but not the Tuner part of the Stick. I have to do the whole cycle of the stick at least 3 times for it to actually recognize the card. Unfortunately there is nothing to verify the card information. Hardware Compatibility: Prism Stick New2E (RFID) Stick Prosody T602G SwimSDR T602G Theubel T602 FatFrankie (RFID) T602G Spencer (RFID) T602G Skylink (RFID) T602G Rtl SDR-010 (RFID) T602G Anker T602G R-Tek NT701 Techcom T602D Showtime T602G SageTec T602G XBees T602G Elecraft T602G TC-70 T602G Rasputin (RFID) T602D Realtek AT2600T2A (RFID) T602D Gastev-1 (RFID) T602G KV-ATU (RFID) T602 KV-OTU (RFID) T602 KV-TU (RFID) T602 Xiaomi T602G Philips T602R Vudu T602G xxd7550 (RFID) T602G GlowTuner T602G Mygica-d268-driver-d268-dmb-th-tv-stick (RFID) T602G Mygica-d268-driver-d268-dmb-th-tv-stick (RFID) T602D USB Hand-held T602 (RFID) T602R USB Hand-held T602 (RFID) T602V 5ec8ef588b
