What's New In Open Close CD?

This tool will open or close the CD-ROM drive then launch a specified program. For example, you can setup this program so that every time you launch Notepad.exe your CD-ROM drive would open as well. For a better example, just think of a program you use all of the time that requires a CD. Now think how convenient it would be if when you launched that program, it opened your CD-ROM for you. Open/Close CD supports multiple CD drive letters via the command line. Just add the drive letter (ex. d) on the command line to specify the cd-rom to send the command to. Command Line Parameters: Command Line Parameters: -i : Specifies a custom CD drive letter. -s : Specifies a custom CD drive letter. Example: CDDriveOpenClose.exe -i "d" Description: This tool will open or close the CD-ROM drive then launch a specified program. For example, you can setup this program so that every time you launch Notepad.exe your CD-ROM drive would open as well. For a better example, just think of a program you use all of the time that requires a CD. Now think how convenient it would be if when you launched that program, it opened your CD-ROM for you. Open/Close CD supports multiple CD drive letters via the command line. Just add the drive letter (ex. d) on the command line to specify the cd-rom to send the command to. CDDriveOpenClose.exe -i "d" CDDriveOpenClose.exe -s "d" -thumb_up-1 Why am I receiving a "No module named dpkg" error when using python 3? I'm using python3 with kivy. Here is the code: from kivy.app import App from kivy.uix.boxlayout import BoxLayout from kivy.lang import Builder KV = ''' : Button: text: "test" on_press: pass : Button: text: "test2" on_press: dpkg.show_dialog('other_dialog') :

System Requirements:
