TopSales Basic Network Crack + Free Download

This is a tool that allows you to access your customer database and do almost everything possible to make it easier for your business. TopSales Basic Network allows you to work with a comprehensive database of customers' details and provide all necessary tools to increase your business and minimize your costs. What's New in This Release: Improvements: - The installers for all languages are now significantly smaller; - In the case of the English installer, all installer components can be extracted into a single package; - Visual Studio 2012 no longer required. - Lots of minor improvements and bug fixes Improvements: - The English language pack installer no longer requires Visual Studio 2012; - The number of available languages is now even larger; - The English, German and Polish versions of the program include now the options to connect to a SQL Server database. - The Windows installer is now smaller and requires no reboot, but offers the ability to start the program manually; - A slightly more attractive user interface was added for some window titles; - A random name generator for server settings, Windows firewall, firewall settings and other programs was added; - In the case of SQL server, the main program window contains now a list of all programs currently used on that server. Optimizations: - The performance of the program itself has been improved; - All windows are now saved using the Magnifier NER (Nearest Event Right) algorithm, which allows to eliminate all the windows that are not visible on screen. This makes the windows more responsive, especially when there are many windows in the program; - Toolbars are now resized automatically, when switching between the main window and the database; - Microsoft Windows Installer 3.0 or newer are no longer required; - In the case of the English and German language pack installers, Visual Studio 2010 or Visual Studio 2012 is no longer required; - Some performance-intensive actions like the redrawing of the tree and the creation of lists were speeded up; - A more efficient, less resource-consuming and quicker tree for the contacts was added; - The program now allows for the correction of misspelled words; - TopSales Basic Network can now be started manually from the program menu. The English version is completely new for this new release. It does not include any changes to the previous version and is meant for all languages that have been supported by the previous version. *
