Although Photoshop is still the industry standard, we will continue to innovate and expose new features, particularly across the digital imaging area. I am excited about the future of Photoshop. I know many of you are too. While I continue to develop features and new formats, we're also making it easier to choose the workflow best suited for you, whether you're using a Mac or a PC. Together, we'll continue to push the boundaries of what is possible with our tools. Adobe Photoshop is increasingly mobile-responsive and can be used with any device running iOS. The new software app now lets you sync your artworks between a variety of Apple devices and from within the program. Adobe has also included an updated release date (Beta 6.0) to better communicate when updates are coming to Photoshop. The new software app debuts as a free update for existing users on any version of iOS (7.1.2 and greater). New users can get started for free with Photoshop on the web or on any Windows, OS X, or Linux device. You can use the menu bar to select the right tool, for example, Document, Layers, Modes. Each option has a slightly different purpose, so if you want to know what a particular application button does, select it and examine the menu. The mouse wheel in the bottom of the screen lets you control the zoom level. The Edit menu provides commands for basic text and image editing. The Info panel notes the resolution, bytes per pixel, and other details. Warp, Smudge, and other tools are often obvious and intuitive. But World War II-era Soviet tanks and airplanes are perhaps not compatible Teutonic rocket science, so check out the Help—otherwise, the buttons hint what they do. A powerful, laser-guided paintbrush suitably optimizes digital paint jobs and is especially handy for drawing. Be real—and yes, that's a permanent ink pen. How many five-star reviews do you think Photoshop had when it first arrived?

With Photoshop Camera preview, users will be able to make any image as art. The Preview panel is similar to what you'll find on a desktop environment. From there you'll be able to explore your canvas, see tactile (read: tangible) realisations of your ideas, handle layers, and see your work in progress. New layers will intelligently appear or disappear based on your actions. As you work in the app, you'll be challenged with new settings to play with. You'll be able to add or remove filters and have an instant preview of your work. Photoshop Camera uses AI to provide a set of augmented reality (AR) tools that transform smartphone photography into personal art on the spot. At the core of every vision is a deep learning model, which can be used to recommend new settings, instantly edit your work, and upend the way you collaborate with creative teams. As you're taking photos, your phone will shuttle towards the image you need, create a virtual version, and compose your perfect shot with AI-powered real-time editing. It can even automatically tell whether you're smiling or not. You can access the AI-guided editing tools from the clip menu to edit your image in real time. You can now edit, pixel by pixel, directly on the phone to create stunning results. The Preview panel gives you a peek into the processing that's happening, so you can instantly tweak your latest work. As phones keep getting smarter, we're currently integrating our deep learning technology into companion apps like Photoshop Camera. The smartphone image processing technology will help this app predict more scenes, machine learning tools to find editing tips, and acts as an AI-powered canvas surface. You'll have the ability to customize your photo, leave a digital footprint, and explore unlimited creative possibilities. You'll instantly have a new vision when you open Photoshop Camera, which will help you explore and build a personal vision in a new way. You can also share your work on your private Instagram account, opt in to share the final image when finished, or print and share your work. Moving forward, we'll have new features and support for other creative apps, so you'll be able to use your camera to explore creative ways to get what you need. e3d0a04c9c
